

BeachTech®

Sweepy mechanically

THE SMALL ALL-ROUNDER

SWEEPY WITH MECHANICAL DRIVE HEAD –
FOR PERFECT BEACH CLEANING

BEACHTECH SWEEPY WITH MECHANICAL DRIVE HEAD

The mechanically driven BeachTech Sweepy is ideal for cleaning and grading small beach sections. But also for volleyball courts and other sandy areas. The BeachTech Sweepy with mechanical drive head and 3-speed gear box allows uncomplicated operation. The Sweepy is extremely maneuverable and easy to turn thanks to the integrated wheel freewheel gear which has a positive effect when using it in narrow areas between deck chairs or other sandy areas such as playgrounds.

Multi Use

Auxiliary equipment opens up application options in addition to just sand. In next to no time, the modular quick-change system can be used to turn the small beach cleaner into a snowplow, a leaf vacuum, a snow blower, a salt spreader, etc. There are many more options available.

All Way Blade

Transport hopper

Snow tiller

Speed

- ⊕ The driver regulates the driving and working speeds via 3 forward and reverse gears.

Robust and durable

- ⊕ Thanks to the rugged design, the corrosion protection using cathodic-dip coating and the application of GRP parts, the Sweepy is low-maintenance and low-wear.

Maneuverability

- ⊕ With one hand movement, the wheel freewheel gear is activated to turn the Sweepy comfortably.

Handle bar

- ⊕ The handle bar inclination can be adjusted to body height without tools.

Waste container

- ⊕ The large waste container can be emptied and cleaned quickly.

Sifting screen

- ⊕ The twin sifting screens minimize the oscillations. They clean effectively even when the sand is wet.
